Orb

Bonus Orb

Collect Orb

Sticky Spin Feature

The Sticky Spin Feature is randomly triggered if at least one Orb or Bonus Orb appears, and the Dimension Link Feature was not triggered. All visible Orbs or Bonus Orbs are held for three spins and additional Orbs or Bonus Orbs reset the spin counter to three. The Sticky Spin Feature ends if the Dimension Link Feature is triggered or no more spins are left.

Dimension Link Feature

The Feature is triggered if at least six Orbs or Bonus Orbs appeared in the base game or are collected during the Sticky Spin Feature. Additionally, the Dimension Link Feature may randomly be triggered via the perceived persistence system. Initially, three spins are awarded and all appearing Orb, Collect Orb or Bonus Orbs are held until the Feature is completed. If at least one additional Orb, Collect Orb or Bonus Orb appears during a spin, the counter is reset to three. The Feature ends if all 15 positions are occupied by Orb, Collect Orb or Bonus Orbs or no more spins are left. Each Orb contains a credit prize, the MINI, MINOR, MAXI or MAJOR Jackpot. If all 15 positions are occupied the GRAND Jackpot is awarded.

Four additional Features can be triggered during the Dimension Link Feature:

- **Rescue Spin Feature:** Three additional Rescue Spins are awarded. These spins are used if no more of the normal spins are left.
- **Multiplier Feature (Rise of the Scarab):** A multiplier x2, x3 or x5 is drawn and up to five already appeared Orbs are scaled by the multiplier.
- **Extra Pays Feature (Secrets of the Hawk):** A value is drawn and up to four already appeared Orbs are increased by the drawn value.
- **Collect Feature (Rise of the Scarab):** Collects the values of all Orbs.
- **Duster Feature (Secrets of the Hawk):** Collects the values of all Orbs up to three times.
- **Bonus Orb:** Triggers the Dimension Link Bonus Feature.

Dimension Link Bonus Feature

A Dimension Link Bonus Feature is triggered for Bonus Orb during the Dimension Link Feature. The Dimension Link Bonus Feature is played on 8 individual reels and three spins are initially awarded. If at least one additional Orb appears during a spin, the counter is reset to three. The Feature ends if all 8 positions are occupied by Orbs or no more spins are left. Each Orb contains a high credit prize, the MINI, MINOR or MAXI Jackpot. If all 8 positions are occupied the INTERSTELLAR 8 Jackpot is additionally awarded.

Action until the last spin

The FIVE respin Feature whisks you away to faraway and mysterious Egypt. In the shadow of the great and ancient pyramids, you can take your chance at exciting cash games with fantastic wins.

How do I recognise a game with the FIVE Feature?

Games that include the FIVE Feature have a pyramid symbol on the Game Button. These are currently the games Cash Fruits FIVE and Seven Wild FIVE.

Triggering the FIVE Feature

To start the Feature, you'll need to land at least five Scatter symbols.

The FIVE Feature

When the Feature is triggered, the amounts shown on the individual Scatter symbols (pyramids) in the basic game are matched 1:1 – including their positioning – as a guaranteed win.

Triggering the respin mode

In respin mode, all positions where no pyramid has landed are started. If no new pyramid is landed, you have two more respins left. Landing one or more new pyramids awards three more respins, and so on until no more pyramids are landed.

Ending the FIVE Feature

The Feature ends when you have used up all your respins or filled all five cashpot towers. If you have completely filled one or more towers, the tower winnings are added to the individual wins of the pyramids. The individual amounts of the pyramids in the towers are always aggregated at the end of the feature. However, if a tower is completely filled, the corresponding Jackpot is additionally paid out.
