Action until the last spin

The FIVE respin feature whisks you away to faraway and mysterious Egypt. In the shadow of the great and ancient pyramids, you can take your chance at exciting cash games with fantastic wins.

How do I recognise a game with the FIVE Feature?

Games that include the FIVE Feature have a pyramid symbol on the Game Button. These are currently the games Cash Fruits FIVE and Seven Wild FIVE.

Triggering the FIVE Feature

To start the feature, you'll need to land at least five Scatter symbols.

The FIVE Feature

When the feature is triggered, the amounts shown on the individual Scatter symbols (pyramids) in the basic game are matched 1:1 – including their positioning – as a guaranteed win.

Triggering the respin mode

In respin mode, all positions where no pyramid has landed are started. If no new pyramid is landed, you have two more respins left. Landing one or more new pyramids awards three more respins, and so on until no more pyramids are landed.

Ending the FIVE Feature

The feature ends when you have used up all your respins or filled all five cashpot towers. If you have completely filled one or more towers, the tower winnings are added to the individual wins of the pyramids. The individual amounts of the pyramids in the towers are always aggregated at the end of the feature. However, if a tower is completely filled, the corresponding Jackpot is additionally paid out.
